

CARBON GOUGING ELECTRODE

Carbon Electrode for Cutting ve Gouging -

Standards

TS 9469 CuC-A

Product Features and Advantages

Cutting and Gouging carbon electrodes are able to work with high current values and used for cutting high tickness scale metals easily. They also gouge 25mm at a single pass according to electrodes thickness. Provides observe for the cracks while gouging. Cutting with carbon electrodes is the best way to cut unnecessary agglomerations and broken edges. Carbon torches need 6-7 atmosphere for cutting .

Applications

Carbon electrodes have wide range of use for cutting and gouging steel, stainless steel, copper alloys, nickel alloys and cast irons.
